15. 加法と減法(分数)①

1 計算しなさい。

$$\bigcirc \left(-\frac{5}{9}\right) + \left(+\frac{11}{6}\right) - \left(-\frac{3}{4}\right)$$

$$(3) \left(-\frac{5}{6}\right) - \left(+\frac{7}{2}\right) + \left(+\frac{4}{9}\right)$$

$$\left(-\frac{8}{15}\right) - \left(+\frac{13}{6}\right) + \left(-\frac{2}{3}\right)$$

$$\bigcirc \left(+\frac{9}{5}\right) - \left(-\frac{5}{6}\right) + \left(-\frac{4}{3}\right)$$

2 計算しなさい。

1
$$\left(+\frac{1}{5}\right) - \left(+\frac{3}{2}\right) + \left(-\frac{3}{4}\right) + \left(-\frac{7}{10}\right)$$

$$(-\frac{7}{6}) + (+\frac{17}{8}) - (+\frac{4}{3}) - (-\frac{1}{4})$$

$$(3)$$
 $\left(+\frac{8}{9}\right) + \left(-\frac{5}{6}\right) - \left(-\frac{1}{2}\right) - \left(-\frac{4}{3}\right)$

$$(-\frac{3}{2}) + (+\frac{7}{4}) - (+\frac{5}{16}) + (-\frac{3}{8})$$
